OPERATIVE COURSE - ONLINE

The ASHTAS Operative Course is the foundation of the ASHTAS series of courses and is intended for all involved in the design, installation and maintenance of road safety barriers. The following topics are delivered as part of the standard Operative Course:

- ASHTAS overview
- Introduction to ASHTAS schemes
- History of road restraint systems
- Quality control, assurance and standards
- Installation requirements
- System performance
- Road and barrier terminology

The Operative course has been enhanced by Safe System Solutions Pty Ltd to provide course participants with an understanding of:

- Barrier selection
- Barrier performance requirements
- Design and installation issues
- Case studies

Course participants who successfully complete the course will receive an ASHTAS Operative e-certificate and can progress to the ASHTAS Installer Course.

TRAINER

Tony Bull

Tony worked with VicRoads / DoT for thirty-nine years. Tony specialised in road maintenance & road construction. Before accepting an early retirement package, he was Program Manager – Maintenance across regional Victoria.

On three occasions Tony worked overseas (Philippines, Dubai and Indonesia) with VicRoads International delivering best practice documentation for traffic management at roadworks.

Tony is a specialist trainer delivering the Austroads Safety Hardware Training Accreditation Scheme (ASHTAS) Operative training.
