

# SAFE SYSTEM ASSESSMENTS TRAINING

**STARTS 10 NOVEMBER 2020  
10AM - 12NOON**

**Safe System Assessments** are the **best-practice method to ensure safe roads** because they check that Safe System principles are embedded in road infrastructure projects. Safe System Assessments are mandatory processes for large projects in **Victoria, South Australia, Queensland and New Zealand**, and are being used by **Transport for NSW** in the planning phase of major road projects.

This course provides participants with the key **skills and tools** to undertake a Safe System Assessment in accordance with the **Austrroads Safe System Assessment Framework**. It also covers the content of the Victorian and South Australian Guidelines, the Qld DTMR Road Safety Policy and the established process in New Zealand and New South Wales.

## NATIONAL ROAD SAFETY STRATEGY

The **Inquiry into the National Road Safety Strategy** states that the : “[The Safe System Assessment Framework] **needs to be used on all road infrastructure projects at all levels of government** and within the private sector.” While road safety audits can pick up specific design deficiencies, Safe System Assessments are still required to **ensure that a harm elimination agenda is being pursued**.

The inquiry recommended that a “Key Action: All Commonwealth infrastructure funding to include star rating and safety performance criteria with Safe System Assessments to be used at the planning and completion stages on all projects.” (p.65)

## WHO SHOULD PARTICIPATE?

- State and Local government personnel
- Engineers, planners, designers, traffic managers
- Consultants involved in road safety auditing
- Road safety practitioners
- Road Safety Auditors that want to meet the requirements of the new Austrroads Guide to Road Safety Part 6 and 6A
