

# Key Changes to the Austroads Guide to Road Safety

## Part 2

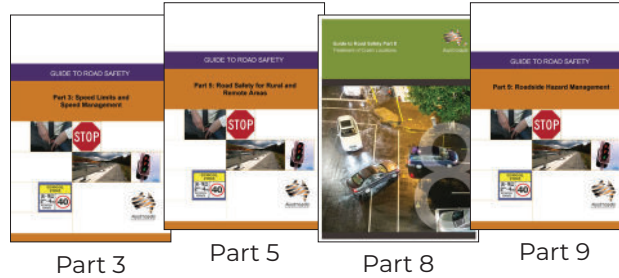

## Safe Roads

The Austroads Guide to Road Safety Part 2: Safe Roads is a **new** part in the Guide to Road Safety series.

It aligns with the Safe Roads element of the Safe System.

### Updated Content

#### Old AGRS Parts

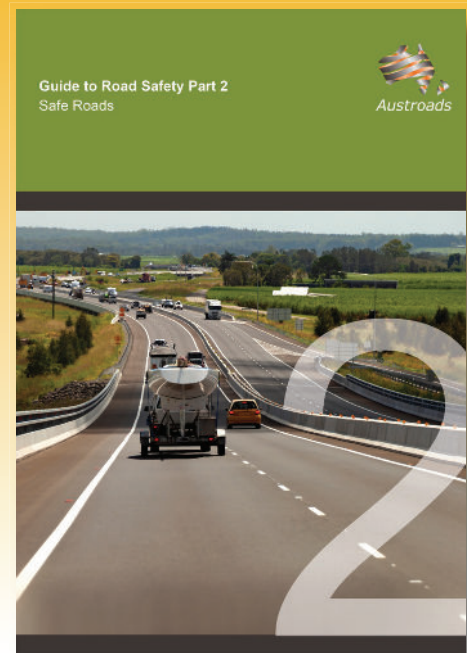

### New Content

Austroads research reports and publications

Australian Standards 1742.2 (2009)

In this new Part of the AGRS, you will find:

- ▶ Updated discussion on **reactive vs proactive** approaches to crash prevention
- ▶ Road crash data sources, codes and the technology used to collect road crash data
- ▶ Methods to identify crash locations
- ▶ Crash problem diagnosis and treatment selection, including **new** material on the definition of a safe road environment, CMF calculations for multiple treatments and treatment implementation
- ▶ Updated information on economic appraisal, monitoring and evaluation of projects
- ▶ **New!** Information on harm minimisation at intersections and with high speed lane departures
