Active Transport Corridors Analysis, Development & Design

CITY OF GREATER
BENDIGO

Safe System Solutions Pty Ltd was engaged by the City of Greater Bendigo to analyse, develop and design upgrades to their two key active transport strategic corridors. The project involved:

- Reviewing the existing conditions of Mundy Street and Hargreaves Street;
- Examining the strategic function of these corridors including the surrounding land use;
- Development of concept design options for these corridors that reflect the functions, needs and constraints of each route;
- Formulating a robust evaluation methodology to evaluate the preferred corridor option;
- Production of a delivery framework to identify implementation options (staged construction).

Project: Bendigo Active Transport Corridors – Analysis, Development and Design

Client: City of Greater Bendigo

Year: 2021
