## Cycling and Pedestrian Facilities Safety and Accessibility Audit

Safe System Solutions Pty Ltd was engaged to conduct safety and accessibility audits at 20 local facilities, paying special attention to access for pedestrians and cyclists. The project involved comprehensive site inspections of key routes to the facilities, identifying access issues and making recommendations for improvements based on Australian Standards. Where standards could not be met, alternative recommendations were made with justifications. A prioritisation tool was developed that considered: risk to safety; compliance with standards; route usage; and value for money.

**Project:** Cycling and Pedestrian Facilities – Safety and Accessibility Audit

**Client:** Moonee Valley City Council

**Year:** 2018
