

TECHNICAL TRAINING

International Road Safety Training Courses

Safe System Solutions Pty Ltd has run over 1,200 days of road safety technical training courses for delegates and individuals from over 75 countries. These have included in-country training, hosted training workshops in Australia and online interactive training courses.

Our approach in capacity building is to customise our domestic workshops and courses to suit each country's needs or to ascertain the needs of our clients in detail and to create a unique course to address their specific requirements.

In 2019 Safe System Solutions Pty Ltd was awarded a Prince Michael International Road Safety Award for our international road safety technical training.

Our most popular courses, which have been delivered internationally, include:

- Making Roads Motorcycle Friendly
- Road Safety Auditing
- Advanced Road Safety Auditing
- The Safe System
- Austroads Guide to Road Safety
- Road Safety Planning and Management
- Road Design for Heavy Vehicles
- Crash Investigation
- Black Spot identification and treatment
- Roadside Safety / Road Safety Barriers
- Intersection Design
- Safe System Assessments
- Roundabout Design
- Road Safety Management / Vision Zero Planning
- Cycling Infrastructure
- Pedestrian Safety Infrastructure
