Monash University – Cycling Plan

Safe System Solutions Pty Ltd was engaged by the Monash University to identify public infrastructure projects that would increase the number of staff and students cycling to the Clayton Campus.

Safe System Solutions Pty Ltd conducted site investigations of all routes to the campus and assessed opportunities for upgrades and risk removal. The report included a fully referenced map of key routes with photos and descriptions of issues together with illustrated recommendations and prioritisation. The original 2015 Plan was well received and resulted in an extensive update, with all new recommendations, in 2018.

Project: Monash University – Cycling Plan

Client: Monash University

Year: 2015 and 2018
