Motorcycle Road Safety Audits

Safe System Solutions Pty Ltd has undertaken motorcycle specific Road Safety Audits for over 30 roads with a total distance of over 1,500km. These have included local and state roads.

Safe System Solutions Pty Ltd uses world's best practices processes for undertaking motorcycle specific audits. This involves using an instrumented motorcycle, experienced motorcycle rider (who is also a qualified road safety auditor), and a trailing car occupied by accredited road safety auditors. The audit reports have been used as the basis of funding applications for state and federal road safety programs.

Some motorcycle audits completed include Victoria's North East Region, Hollow Tree Road, Lake Leake Road, Toodyay Road, Hoddle Street and Dalyston-Glen Forbes Road, the Great Alpine Road, Great Ocean Road, Lorne - Deans Marsh Road.
