Road Safety Review CityLink Sound Tube Lighting

Safe System Solutions Pty Ltd (SSS) was engaged by Transurban to undertake a Road Safety Review of the proposed lighting of the Sound Tube on CityLink. The review included; reviewing background information and reports, inspecting the site (various drive-throughs), human factors analysis, risk assessment from a traffic and safety perspective based on the operational context.

The assessment received positive feedback from the client and was used to help in their risk assessment and management processes for this innovative project.

Project: CityLink Sound Tube Lighting

Client: Transurban

Year: 2017
