Road Trauma – Data Analysis

VicRoads Western Region

Road Trauma Analysis

safesystemsolutions.com.au

Safe System Solutions Pty Ltd was engaged to review and analyse road crash data within Western Victoria.

The analysis included extracting data from the Road Crash Information System, reviewing and cleaning data, preparing spatial data presentations and graphing trauma trends.

This material was then used to assist the region in their road safety infrastructure development planning, community road safety interventions and their work with local government and Victoria Police.

The data was ultimately used to develop the Western Region Road Safety Strategy.

Project: Road Trauma – Data Analysis

Client: VicRoads Western Region

Year: 2017
