Strengthening Speed and Infrastructure Programme Outcomes

New Zealand's Road to Zero Strategy aims to reduce road deaths and serious injuries by 40 per cent to 2030. The Strategy adopts the Safe System approach and includes a Speed and Infrastructure Programme. Safe System Solutions Pty Ltd was engaged to assist in setting up the new Programme for success by advising on opportunities to strengthen outcomes. Global programme risks and responses to these were examined using agency and stakeholder interviews. A Safe System performance assessment tool was then developed and piloted on 12 projects to map out areas for improving Waka Kotahi's delivery of Safe System outcomes.

Project: Strengthening Speed and Infrastructure Programme Outcomes

Client: Waka Kotahi – New Zealand Transport Agency

Year: 2021
