AUSTROADS SAFETY HARDWARE TRAINING ACCREDITATION SCHEME

OPERATIVE COURSE - IN-PERSON

The ASHTAS Operative Course is the foundation of the ASHTAS series of courses and is intended for all involved in the installation and maintenance of road safety barriers. The following topics are delivered as part of the standard Operative Course:

- ASHTAS overview
- Introduction to ASHTAS schemes
- History of road restraint systems
- Quality control, assurance and standards
- Installation requirements
- System performance
- Road and barrier terminology

The standard course has been enhanced by Safe System Solutions to provide course participants with an understanding of:

- Barrier selection
- Barrier performance requirements
- Design and installation issues
- Case studies

Course participants who successfully complete the course will receive an ASHTAS Operative e-certificate and can progress to the ASHTAS Installer Course.

WHO SHOULD ATTEND

- Anyone working with road safety barriers
- Barrier installers
- Road construction crew
- Road construction crew supervisors
- Road construction managers
- Construction engineers

TRAINER

Tony Bull

Tony worked with VicRoads / Regional Roads Victoria / Department of Transport (DoT) for thirty-nine years. He is a specialist trainer delivering road safety audit trainer for over 20 years.
