

# AUSTROADS SAFETY HARDWARE TRAINING ACCREDITATION SCHEME

## Installer Module A ONLINE

The ASHTAS Installer Module A course is designed to ensure that barrier installations are carried out safely and correctly the first time, every time.

To achieve full ASHTAS Installer status, candidates must successfully complete Installer Module A, at least one ASHTAS Installer Module B, and meet the e-logbook requirements of the practical assessment.

Course participants who successfully complete the Installer Module A training will be able to:

- Understand the general requirements for the installation, inspection, maintenance, and repair of Road Safety Barrier Systems (RSBS).
- Understand the qualifications and requirements an Installer must meet to comply with the ASHTAS training framework.
- Effectively use the e-logbook to document evidence for career progression and ongoing professional development.
- Gain eligibility for Installer Module B training.

### WHO SHOULD ATTEND

- Anyone who has achieved ASHTAS Operative status and wishes to begin their journey toward ASHTAS Experienced Installer.

### TRAINER

#### Tony Bull

Tony worked with VicRoads / DoT for thirty-nine years, specialising in road maintenance & road construction.

Before accepting an early retirement package, he was Program Manager – Maintenance across regional Victoria.

On three occasions Tony worked overseas (Philippines, Dubai and Indonesia) with VicRoads International delivering best practice documentation for traffic management at roadworks.

Tony is a specialist trainer who has been delivering the Austrorods Safety Hardware Training Accreditation Scheme (ASHTAS) training since June 2023 across Australia, as well as in New Zealand and Abu Dhabi.

### COURSE PREREQUISITES
